

**Teepee Lodges**

We would like to thank the countless people and other organizations and groups for supporting us and net working with us, for together we can bring a cleaner and brighter tomorrow for all our children, a friendly handshake goes out to you.

Red Thunder receives no government funding and is dependant on small contributions and mini grants from the public sector to help cover expenses and operating costs for our part-time dedicated volunteers. We have no payed employees, no membership fees, no staffed office and little support from fund raising on a high jobless rate Indian Reservation. We realize the hard working taxpayer has a hard time earning a buck in the modern world economy and we promise to get the maximum results from your donations and sacrifice to us. Your contributions will be tax deductible with 501 (c) (3) I.R.S. guidelines.

Thank You !

RED THUNDER INC.  
NATURES NON-PROFIT

Red Thunder Inc. was formed in July 1990 as a Montana non-profit organization and is tax exempt under I.R.S. 501 (c) (3) status.

Our long range goal is to preserve Native Indian Sacred Traditional and Cultural sites and values from destruction and systematic eradication, such as has been seen in the past 500 years.

We love our children and grandchildren, we cannot stand idle while their futures are being jeopardized by foreign influences, such as the devastation taking place in the sacred Little Rocky Mountains by big mining corporations, under the 1872 Mining Law, which is nothing more than a loop-hole for the give away of billions of dollars worth of public resources. The final aftermath is to leave our children with the clean up bill for billions of gallons of cyanide solutions and tons of mine waste, long after the mining corporations are gone with the profits. This is not to mention the health hazards created by such massive disturbances of the natural environment we all depend on for clean food and water.

Sundance Lodge

Red Thunder Inc. proposes to offer new ideas for human survival and still live in harmony with Mother Nature, such as creating jobs that will research and clean up the thousands of abandoned mines and potential super fund sites already here. But first we have to gain the public's support and turn their elected politicians around in a new direction from mine now and pay later attitudes.

Red Thunder Inc. promotes an alcohol, drug and peyote free lifestyle so the children will have a natural clean mind to solve tomorrows problems, which we the modern civilization will dump on them.

Some of our activities include independant monitoring of streams, fish and wildlife in the Little Rocky Mountains adjacent to the Fort Belknap Indian Reservation for mining related problems. Children environmental conferences from traditional aspect. Keeping the public informed and educated through the news media, when possible. Sponsoring and hosting public forums and traditional ceremonies, such as round dance, fasting and sweat lodges. Net working with other legitimate groups with the same goals and objectives.

Sweat Lodge

Zortman Mine

Some of our accomplishments and victories include a temporary injunction against a large foreign mining interest, through the Interior Board of Land Appeals, against a major mine expansion in the Little Rocky Mountains. An order by the B.L.M. and U.S. Fish and Wildlife Service for Zortman Mining Inc. to net all toxic solutions at each of it's mine sites to prevent any further deaths of migratory birds and wildlife.

Pressure on Pegasus Gold Corp. to clean up and stop polluting King Creek has resulted in an offer of a partial clean up of toxic mine tailings in drainage. Pressure on B.L.M. to form Zortman Mine Expansion E.I.S. advisory committee of which Red Thunder Inc. has been selected to be on. Initial pressure resulting in Zortman Mining Inc. with drawing it's 10 year, 25,000 acre Mineral Exploration Application Plans in the Little Rocky Mountains. Also support of local people and groups in the Sweet Grass Hills against mining exploration by foreign interests resulting in a demand by B.L.M. for a full environmental impact study before exploration can take place. We also were instrumental in diverting plans by the Fort Belknap Community Council to bring Cyanide Heap Open Valley Leach Mining to the Reservation side of the Little Rocky Mountains.
